

Increase Your Top Line

Become JAGGAER Certified

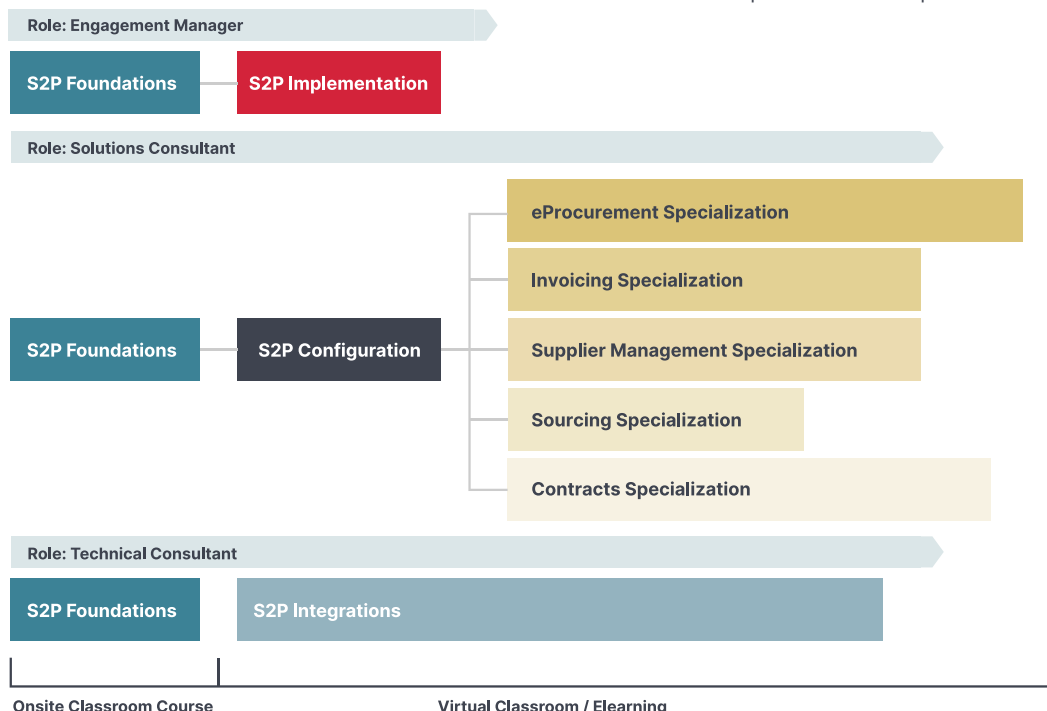

JAGGAER Partner Network Members include world class resellers, system integrators, and technology partners. Every member is seeking to optimize the top line and bottom line impact of their participation.

The JAGGAER Partner Network provides the unique skills needed to help your customers achieve the next level of efficiency across the entire procurement cycle. We collaborate with our certified Partner Network members to drive higher customer engagement and loyalty across all phases of deployment.

The Certification curriculum is designed around three roles: Business consultants, PMs, and implementation consultants. Certification includes in-depth platform training including core product and process comprehension, best practices, and cross-product implementation skills.

Achieve certification on our Spend Management solutions through a combination of classroom training, remote instructor-led virtual courses, and self-paced eLearning sessions that include labs, case studies, and assessments. Certification tracks prepare your team to engage and manage multiple solution specialties.

JAGGAER Certification Tracks

JAGGAER Certification Details
